

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): An information processing system comprising a remote controller terminal and an information processing device, said information processing system wherein:

said remote controller terminal ~~comprises:~~ includes

a wireless telephone mechanism configured to communicate via a wireless telephone network,

first wireless communication means for performing wireless communication with said information processing device,

operation means for entering a command for displaying at least menu items of said remote controller terminal, and for entering a command for requiring a function item of said information processing device and for selecting the function item from among said function items,

first control means for controlling said wireless communication means to send a first command for requiring said function item and sending a second command for requiring further information of said function item according to operation of said operation means, and

display means for displaying said menu items, said function item and said further information, and

~~function item information receiving means for receiving function item information corresponding to each function had by said information processing device which is operated, from said information processing device by radio; and~~

~~processing command transmitting means for transmitting a processing command corresponding to the function item information to said information processing device by radio in accordance with user's input operation, and~~

said information processing device ~~comprises:~~ includes
second wireless communication means for performing wireless communication with
said remote controller terminal,
~~processing command receiving means for receiving the processing command~~
~~transmitted from said remote controller terminal;~~ and
second control means for controlling said second wireless communication means to
send the function item and further information to said remote controller terminal according to
said first command and said second command transmitted from said remote controller
terminal ~~the function corresponding to the processing command to execute processing~~
~~corresponding to the user's input operation to said remote controller terminal.~~

Claim 2 (Canceled).

Claim 3 (Currently Amended): The information processing system according to
Claim [[2]] 1, wherein said operation means is a jog dial for selecting ~~a desired~~ the function
item ~~name~~ out of the plurality of said function item names items by rotation operation and for
fixing ~~the a~~ selection of the function item ~~name~~ by a pushing operation.

Claim 4 (Currently Amended): The information processing system according to
Claim 3, wherein said display means ~~of said remote controller terminal scroll displays~~
displays the plurality of function ~~item names items~~ as a scroll-display in accordance with the
rotation operation of said operation means ~~by the user,~~ and also ~~remarkably~~ displays a ~~desired~~
function item ~~name being selected~~ that is a candidate for selection.

Claims 5-12 (Canceled).

Claim 13 (Currently Amended): A remote controller terminal comprising:
a wireless telephone communication mechanism configured to perform
communication via a wireless telephone network;
wireless communication means for performing wireless communication with an
information processing device;
operation means for entering a command for displaying at least menu items of said
remote controller terminal, and for entering a command for requiring a function item of said
information processing device and for selecting the function item from among said function
items, and
control means for controlling said wireless communication means to send a first
command for requiring said function item and sending a second command for requiring
further information of said function item according to operation of said operation means
~~function item information receiving means for receiving function item information~~
~~corresponding to functions had by an information processing device to be operated, from said~~
~~information processing device by radio; and~~
~~processing command transmitting means for transmitting a processing command~~
~~corresponding to the function item information to the information processing device by radio~~
~~in accordance with user's input operation.~~

Claim 14 (Canceled).

Claim 15 (Currently Amended): ~~The~~ A remote controller terminal according to Claim
[[14]] 13, wherein said operation means is a jog dial for selecting ~~a desired~~ the function item

~~name~~ out of the plurality of said function ~~item-names~~ items in accordance with rotation operation and for fixing ~~the~~ a selection of the function item ~~name~~ by a pushing operation.

Claim 16 (Currently Amended): ~~The~~ A remote controller terminal according to Claim 15, wherein said display means ~~scroll-displays~~ displays the plurality of function ~~item-names~~ items as a scroll-display according to the rotation operation of said operation means by a user and remarkably displays a desired function item ~~name~~ being selected.

Claim 17 (Canceled).
